

Hello Team,

See action items below updates!

We had very productive Win-Win negotiations for round 2. While we did not finish planning poker for the complete set of win conditions, we made substantial conversational progress on some high value conditions. I will detail the various winbook updates below. However, I want to stress that we really seem to be mitigating a lot of the initial uncertainties which is great! Mona, has also already put us one step ahead by providing some very useful wireframes!

Updates:

Following Win Conditions have been created

wc_id-3384 : As a valet operator I can receive real-time requests from customers in an organized queue so that I can retrieve their car in a timely manner

wc_id-3385 : As a valet operator, I can set the valet price for each shift so that I can adjust pricing as needed.

wc_id-3386 : - As a valet operator I can see if a customer has paid or not in the queue so that I know whether to collect cash.

wc_id-3387 : - As a valet operator I can have my own login to my valet company's profile so that I can use the SnapValet application during my shift.

wc_id-3388 : - As a valet company the app will allow my valet attendants to login so that I can track which employees are working at which location during a shift.

wc_id-3389 : - As a valet company I can have multiple locations serviced by my valet company in my profile so that I can track transactions for each location.

wc_id-3390 : - As a valet operator, I can send notifications to the customer that their car is ready so that the customer does not have to wait outside while I retrieve the car.

wc_id-3391 : - As a valet attendant I can receive a transaction summary report for each shift so that I can control my revenue.

wc_id-3392 : - As a driver I can either request or request and pay for valet so that I have the option to not enter in my credit card information if I don't want to

Following Issues have been created

issue_id-1635 : from winconditionId -3203 : Should we display a may or a list okay?
issue_id-1636 : from winconditionId -3204 : How should we pay via the credit cards.
issue_id-1637 : from winconditionId -3205 : Whom does the message/notification goes?
issue_id-1638 : from winconditionId -3205 : How exactly are the tips handled?
issue_id-1639 : from winconditionId -3206 : Tips pooled or sent individually to each valet?
issue_id-1640 : from winconditionId -3206 : would sending an email with a csv file do.
issue_id-1641 : from winconditionId -3211 : Which database to be used ?
issue_id-1642 : from winconditionId -3384 : what if customers don't show up on time?
issue_id-1643 : from winconditionId -3390 : what if customers don't show up on time?

Following Options have been created

opt_id-634 : from IssuedId -1636 : Possibly stripe or braintree..

Special thanks to Nupul's application for generating this report and making my life easier lol.
